Population Exposure

Structures:

Overall, the population in this region resides in structures that are vulnerable to earthquake shaking, though some resistant structures exist.

Historical Earthquakes (with MMI levels):

A magnitude 6.4 earthquake 337 km southeast of this one struck the Northern Mariana Islands on June 6, 1993 (UTC), with estimated population exposures of 54,000 at intensity V and 3,000 at intensity IV, with no reported fatalities.
