

Peanut Butter & Jelly Sandwich Fault

K-4

Lucy Jones

Key Points:

- The outermost portion of the earth is made up of layers of rocks.
- There are three main types of faults: normal, thrust, strike-slip.
- We can see the evidence of an earthquake in the offset layers of the earth.

Steps:

1. Make peanut butter and jelly sandwich with three slices of bread with peanut butter and jelly in between twice.
2. Slice the sandwich at an angle and then demonstrate the different types of faults.
3. Eat the sandwich.
