Quaternary Fault and Fold Database of the United States

As of January 12, 2017, the USGS maintains a limited number of metadata fields that characterize the Quaternary faults and folds of the United States. For the most up-to-date information, please refer to the <u>interactive fault map</u>.

unnamed fault north of La Jolla Canyon (Class A) No. 293

Last Review Date: 2017-07-01

citation for this record: , compiler, 2017, Fault number 293, unnamed fault north of La Jolla Canyon, in Quaternary fault and fold database of the United States: U.S. Geological Survey website,

Synopsis	
Name comments	
County(s) and State(s)	CALIFORNIA
Physiographic province(s)	
Reliability of location	Compiled at 1:100,000 scale. Comments:

T 41 (1)	
Length (km)	km.
Average strike	
Sense of	
movement	
Dip	
Paleoseismology studies	
Geomorphic expression	
Age of faulted surficial	
deposits	
Historic earthquake	
Most recent	undifferentiated Quaternary (<1.6 Ma)
prehistoric deformation	Comments:
Recurrence interval	
Slip-rate category	Unspecified
Date and Compiler(s)	2017
